

TON Village

Your own kingdom
Play to earn gaming

1. INTRODUCTION

In a distant kingdom, where digital lands merge with blockchain innovations, a new force has emerged capable of changing the world.

This is the realm of **TON Village**, where every player has the chance to become the most influential king, owning unique **NFTs** and extracting riches from unseen lands.

In this kingdom, owning explosive **NFTs** not only highlights your significance but also brings a daily income in the form of tokens.

The game operates on the principle of "**Proof of Ownership**," a system that validates an owner's rights to create and possess unique digital assets (**NFTs**).

2. In-Game Currencies

TON VILLAGE strives to deliver a engaging and immersive experience with a diverse range of in-game mechanics.

This enables users to explore multiple strategies for progression and earning opportunities.

You can utilize two in-game currencies:

GOLD

CRYSTALS

2.1. IN-GAME CURRENCIES: GOLD

GOLD is a versatile digital token generated by the game's smart contract, designed to build a robust mining economic model.

It can be mined by owning **NFT** characters or traded for **TON**.

The price when buying and selling **GOLD** is always supported by commissions from purchasing **NFTs** on the site and reselling **NFTs** on **GETGEMS**.

2.2. IN-GAME CURRENCIES: CRYSTALS

CRYSTALS are a remarkable in-game resource that users receive as rewards for their activity on the **TON VILLAGE** platform.

One free claim of **1 CRYSTAL** is available in the app every **12 hours**.

Additional bonus **CRYSTALS** can be earned for completing tasks effectively on social networks.

Once a user accumulates **150 CRYSTALS**, they can exchange them for **1 NFT KING** in the Buy **NFT** section.

3. GAME MECHANICS AND PROOF OF OWNERSHIP

KEY ASPECTS OF PROOF OF OWNERSHIP WITH NFTS:

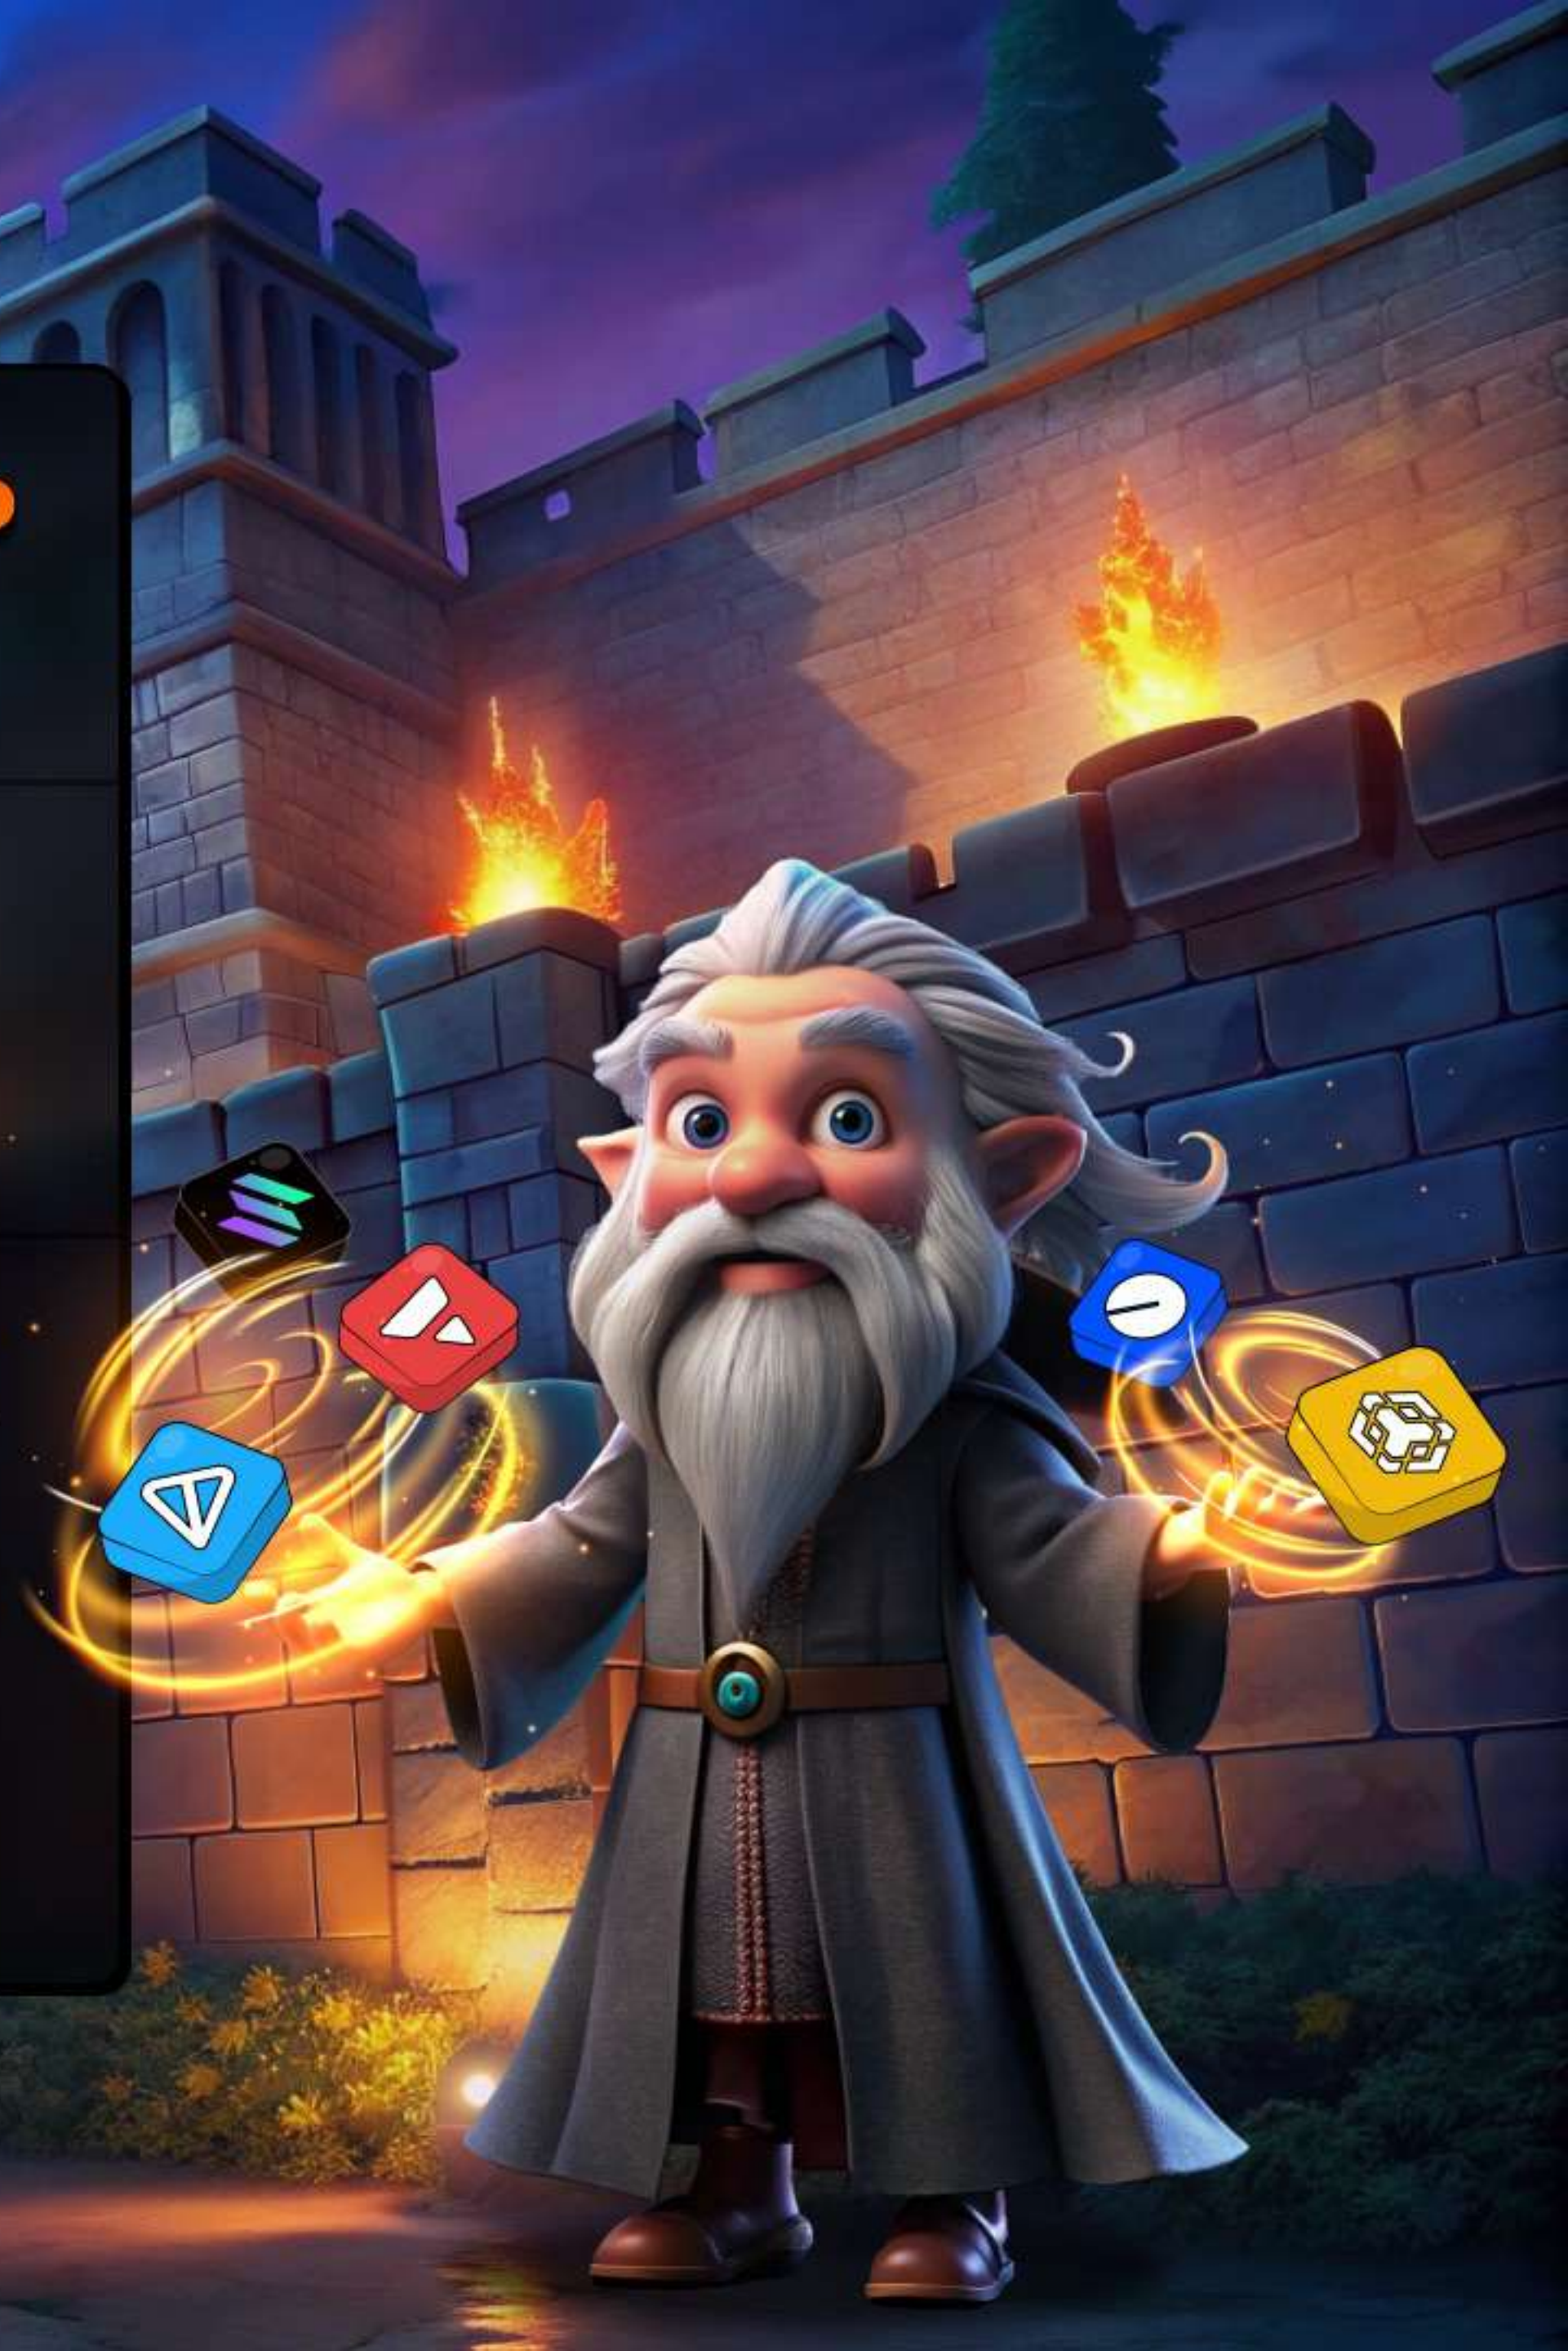

Blockchain:

NFTs are created and registered on the blockchain, ensuring transparency and immutability of ownership records.

Unique Tokens:

Each **NFT** has a unique identifier that distinguishes it from other tokens.

This unique identifier is linked to metadata describing the specific properties and attributes of the digital asset.

KEY ASPECTS OF PROOF OF OWNERSHIP WITH NFTS:

Creation (Minting):

NFTs are created through a process known as "minting". During this process, a unique token is generated with attached metadata that describes the properties and rights to the digital asset.

The record of creating the **NFT** and its current owner is stored on the blockchain.

Trading and Transfer:

The owner can transfer or sell the **NFT** to another party. This process involves signing a transaction with their private key.

Thus, Proof of Ownership with **NFTs** in cryptocurrency provides a reliable and transparent method to confirm ownership rights of unique digital assets in the **TON Village** game. This opens up new opportunities for earning and trading digital assets within **TON Village**.

4. THE BEGINNING OF THE JOURNEY

PHASE 1: KING ASCENDING TO THE THRONE

Every great kingdom starts with a powerful king.

In **TON Village**, owning the **King NFT** opens up unlimited possibilities for you.

As the holder of the King NFT, you have the right to mine tokens without any time restrictions.

Every day brings you new riches, strengthening your kingdom and increasing your influence.

PHASE 2: CASTLES FORTIFYING YOUR HOLDINGS

But no kingdom can do without strong castles.

Your next goal is to acquire **Castle NFTs, which can be purchased with **\$GOLD** game tokens.**

These castles not only symbolize your strength and power but also actively mine **\$GOLD game tokens.**

With each new castle, your kingdom becomes more powerful, attracting the attention of allies and enemies alike.

PHASE 3: LANDS ESTABLISHING A DYNASTY

Owning lands means being a true ruler.

**In TON Village, acquiring Land NFTs gives you
the right to create new King NFTs.**

**These castles not only symbolize your strength and power
but also actively mine \$GOLD game tokens.**

**With each new castle, your kingdom becomes more powerful,
attracting the attention of allies and enemies alike.**

PHASE 4: EXPANDING THE ECOSYSTEM REACHING NEW HORIZONS

Your power is not limited to just one kingdom.

TON Village strives to expand its borders by *integrating with other blockchain networks (multichain)*.

This opens up new opportunities for conquests and trade, allowing you to interact with players from other worlds and networks.

Your influence grows, encompassing more and more territories.

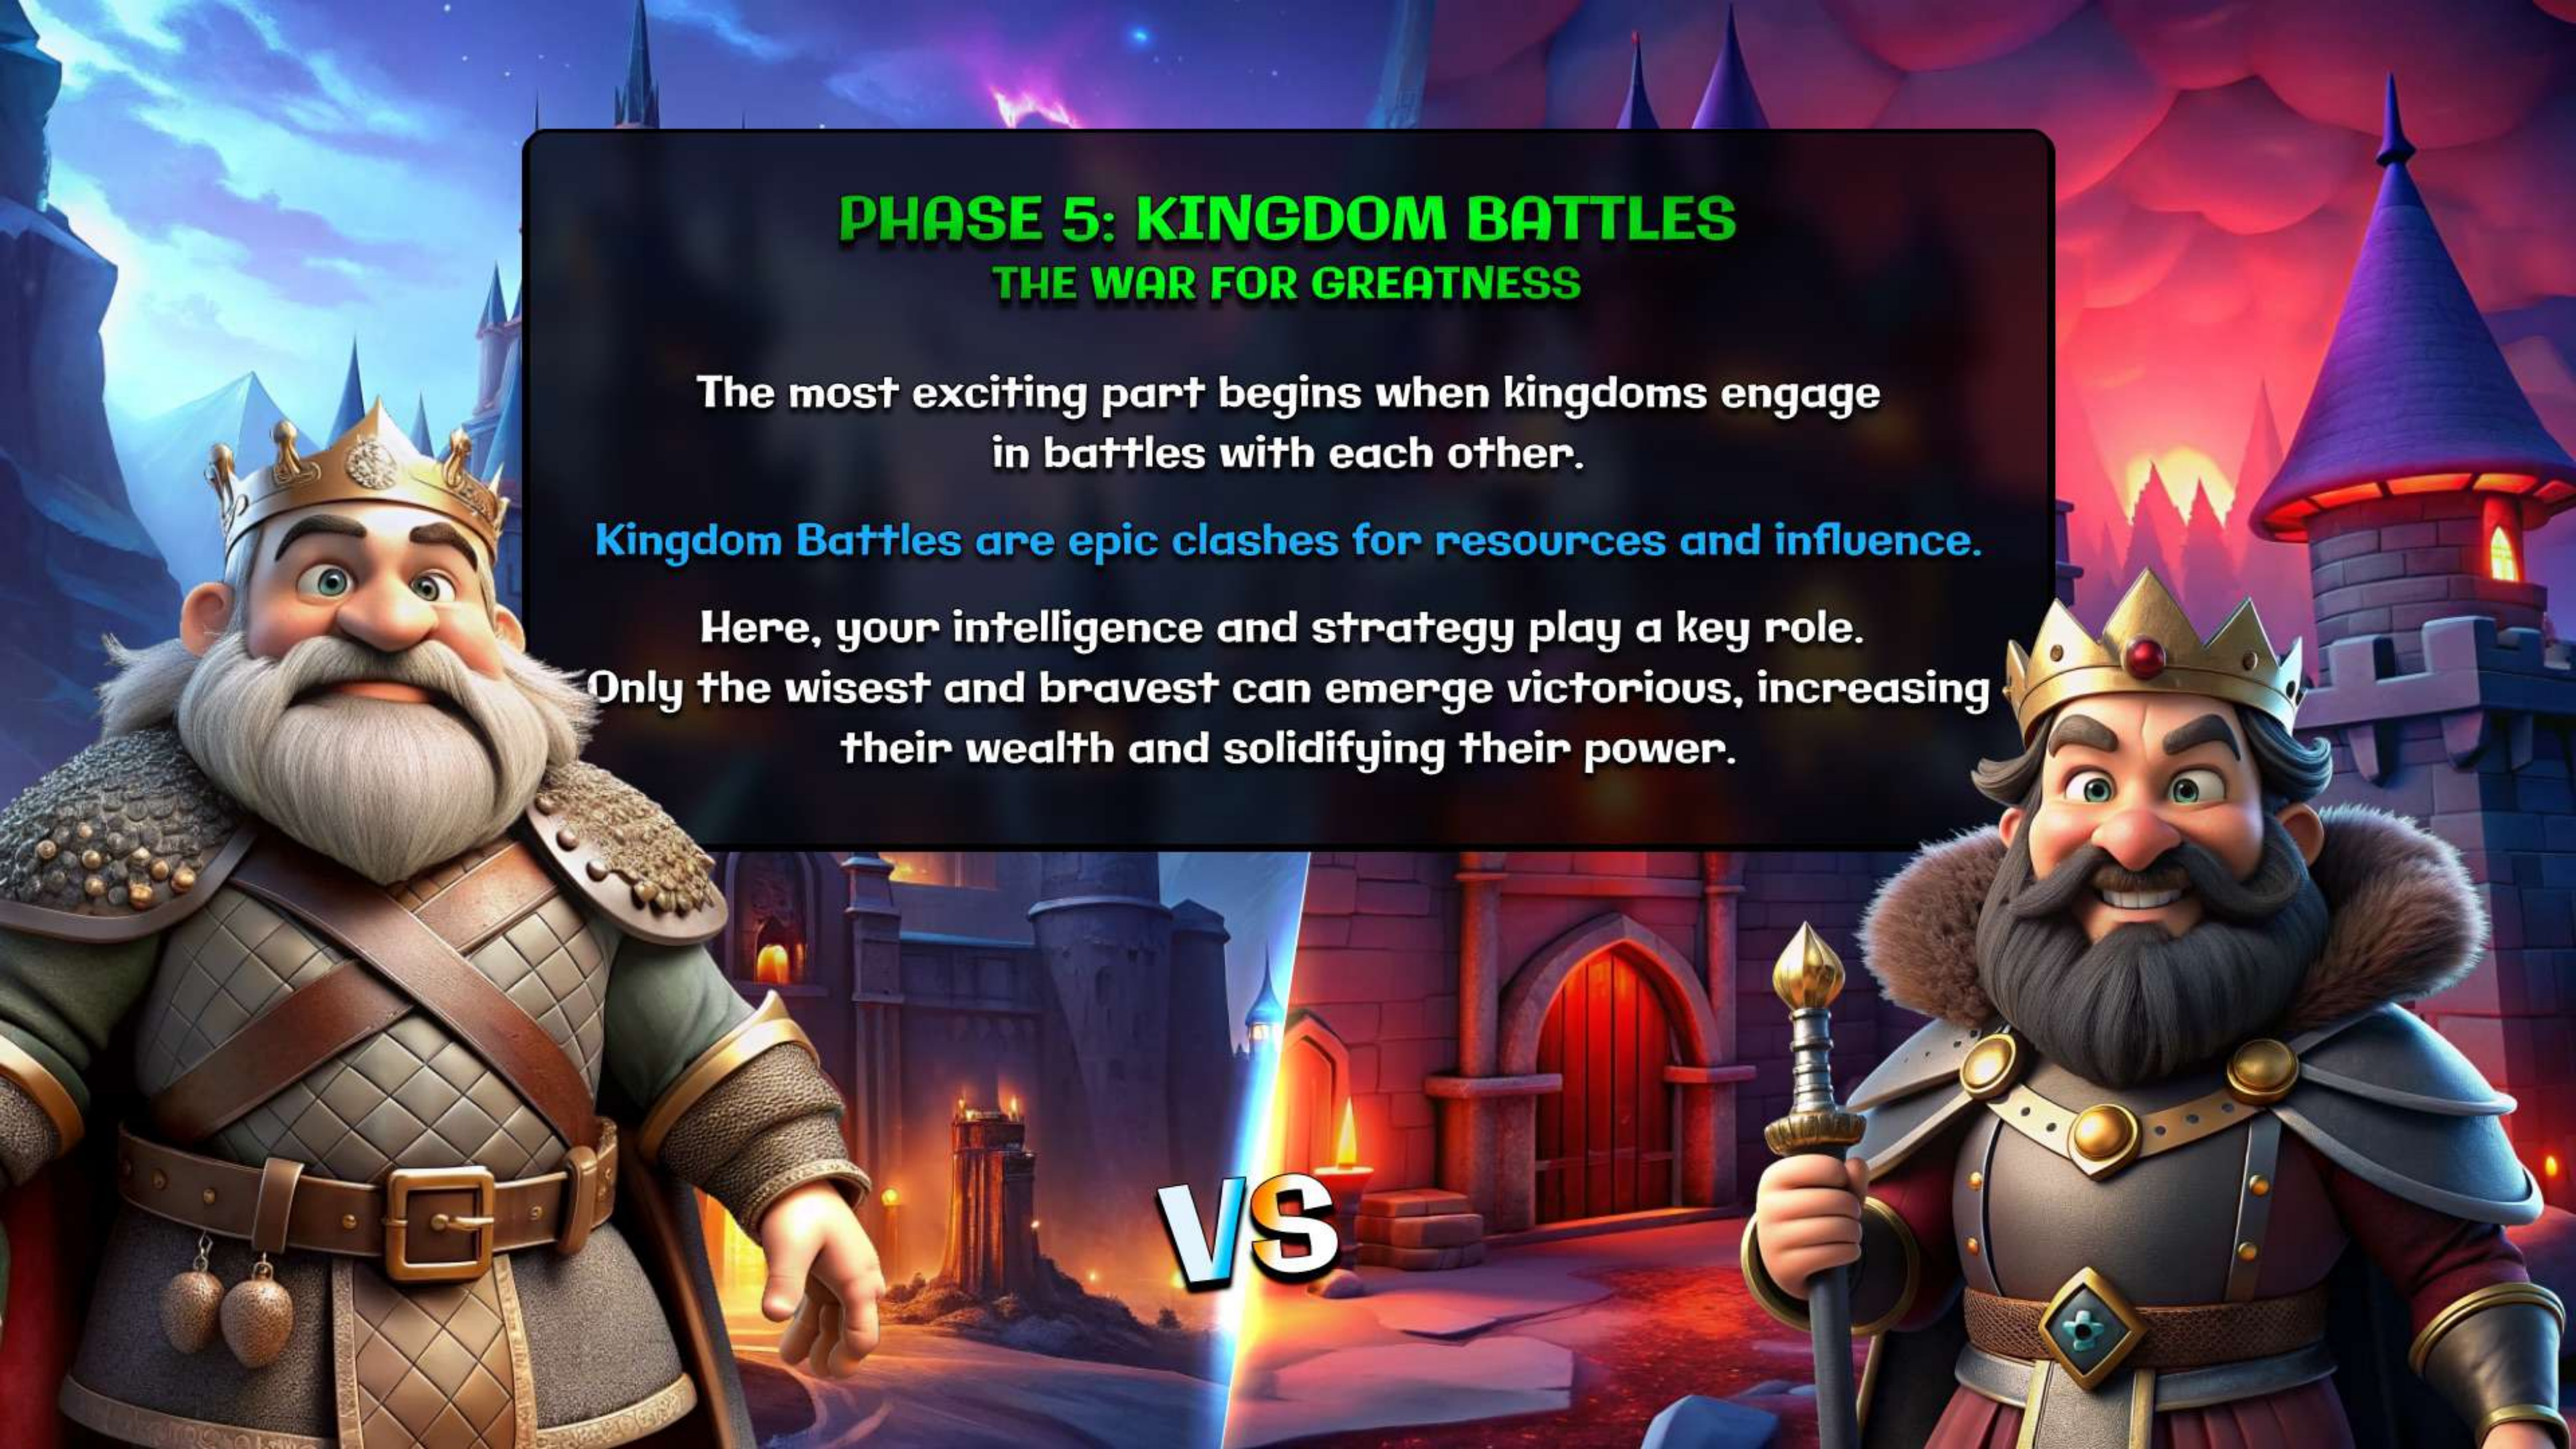

PHASE 5: KINGDOM BATTLES THE WAR FOR GREATNESS

The most exciting part begins when kingdoms engage in battles with each other.

Kingdom Battles are epic clashes for resources and influence.

Here, your intelligence and strategy play a key role. Only the wisest and bravest can emerge victorious, increasing their wealth and solidifying their power.

VS

5. NFTs

NFT 1 - KING

The **King NFT** – Phase 1 in the game **Ton Village**.

The **King NFT** unlocks limitless opportunities for you!

The holder of the **King NFT** gains the right to mine **\$GOLD** tokens without any time restrictions.

The **King NFT** brings you new wealth every day.

The more **King NFTs** a player has, the greater the **\$GOLD** token yield.

NFT 1 - KING MINING MECHANICS OF \$GOLD TOKEN

In **Ton Village**, the mining mechanics for \$GOLD tokens with **King NFTs** operate as follows:

Base Mining Rates:

1 to 2 King NFTs: Each mines 0.07 \$GOLD per hour.

3 to 5 King NFTs: Each mines 0.071 \$GOLD per hour.

6 to 8 King NFTs: Each mines 0.072 \$GOLD per hour.

9 to 11 King NFTs: Each mines 0.073 \$GOLD per hour.

12 to 14 King NFTs: Each mines 0.0742 \$GOLD per hour.

18 to 20 King NFTs: Each mines 0.0766 \$GOLD per hour.

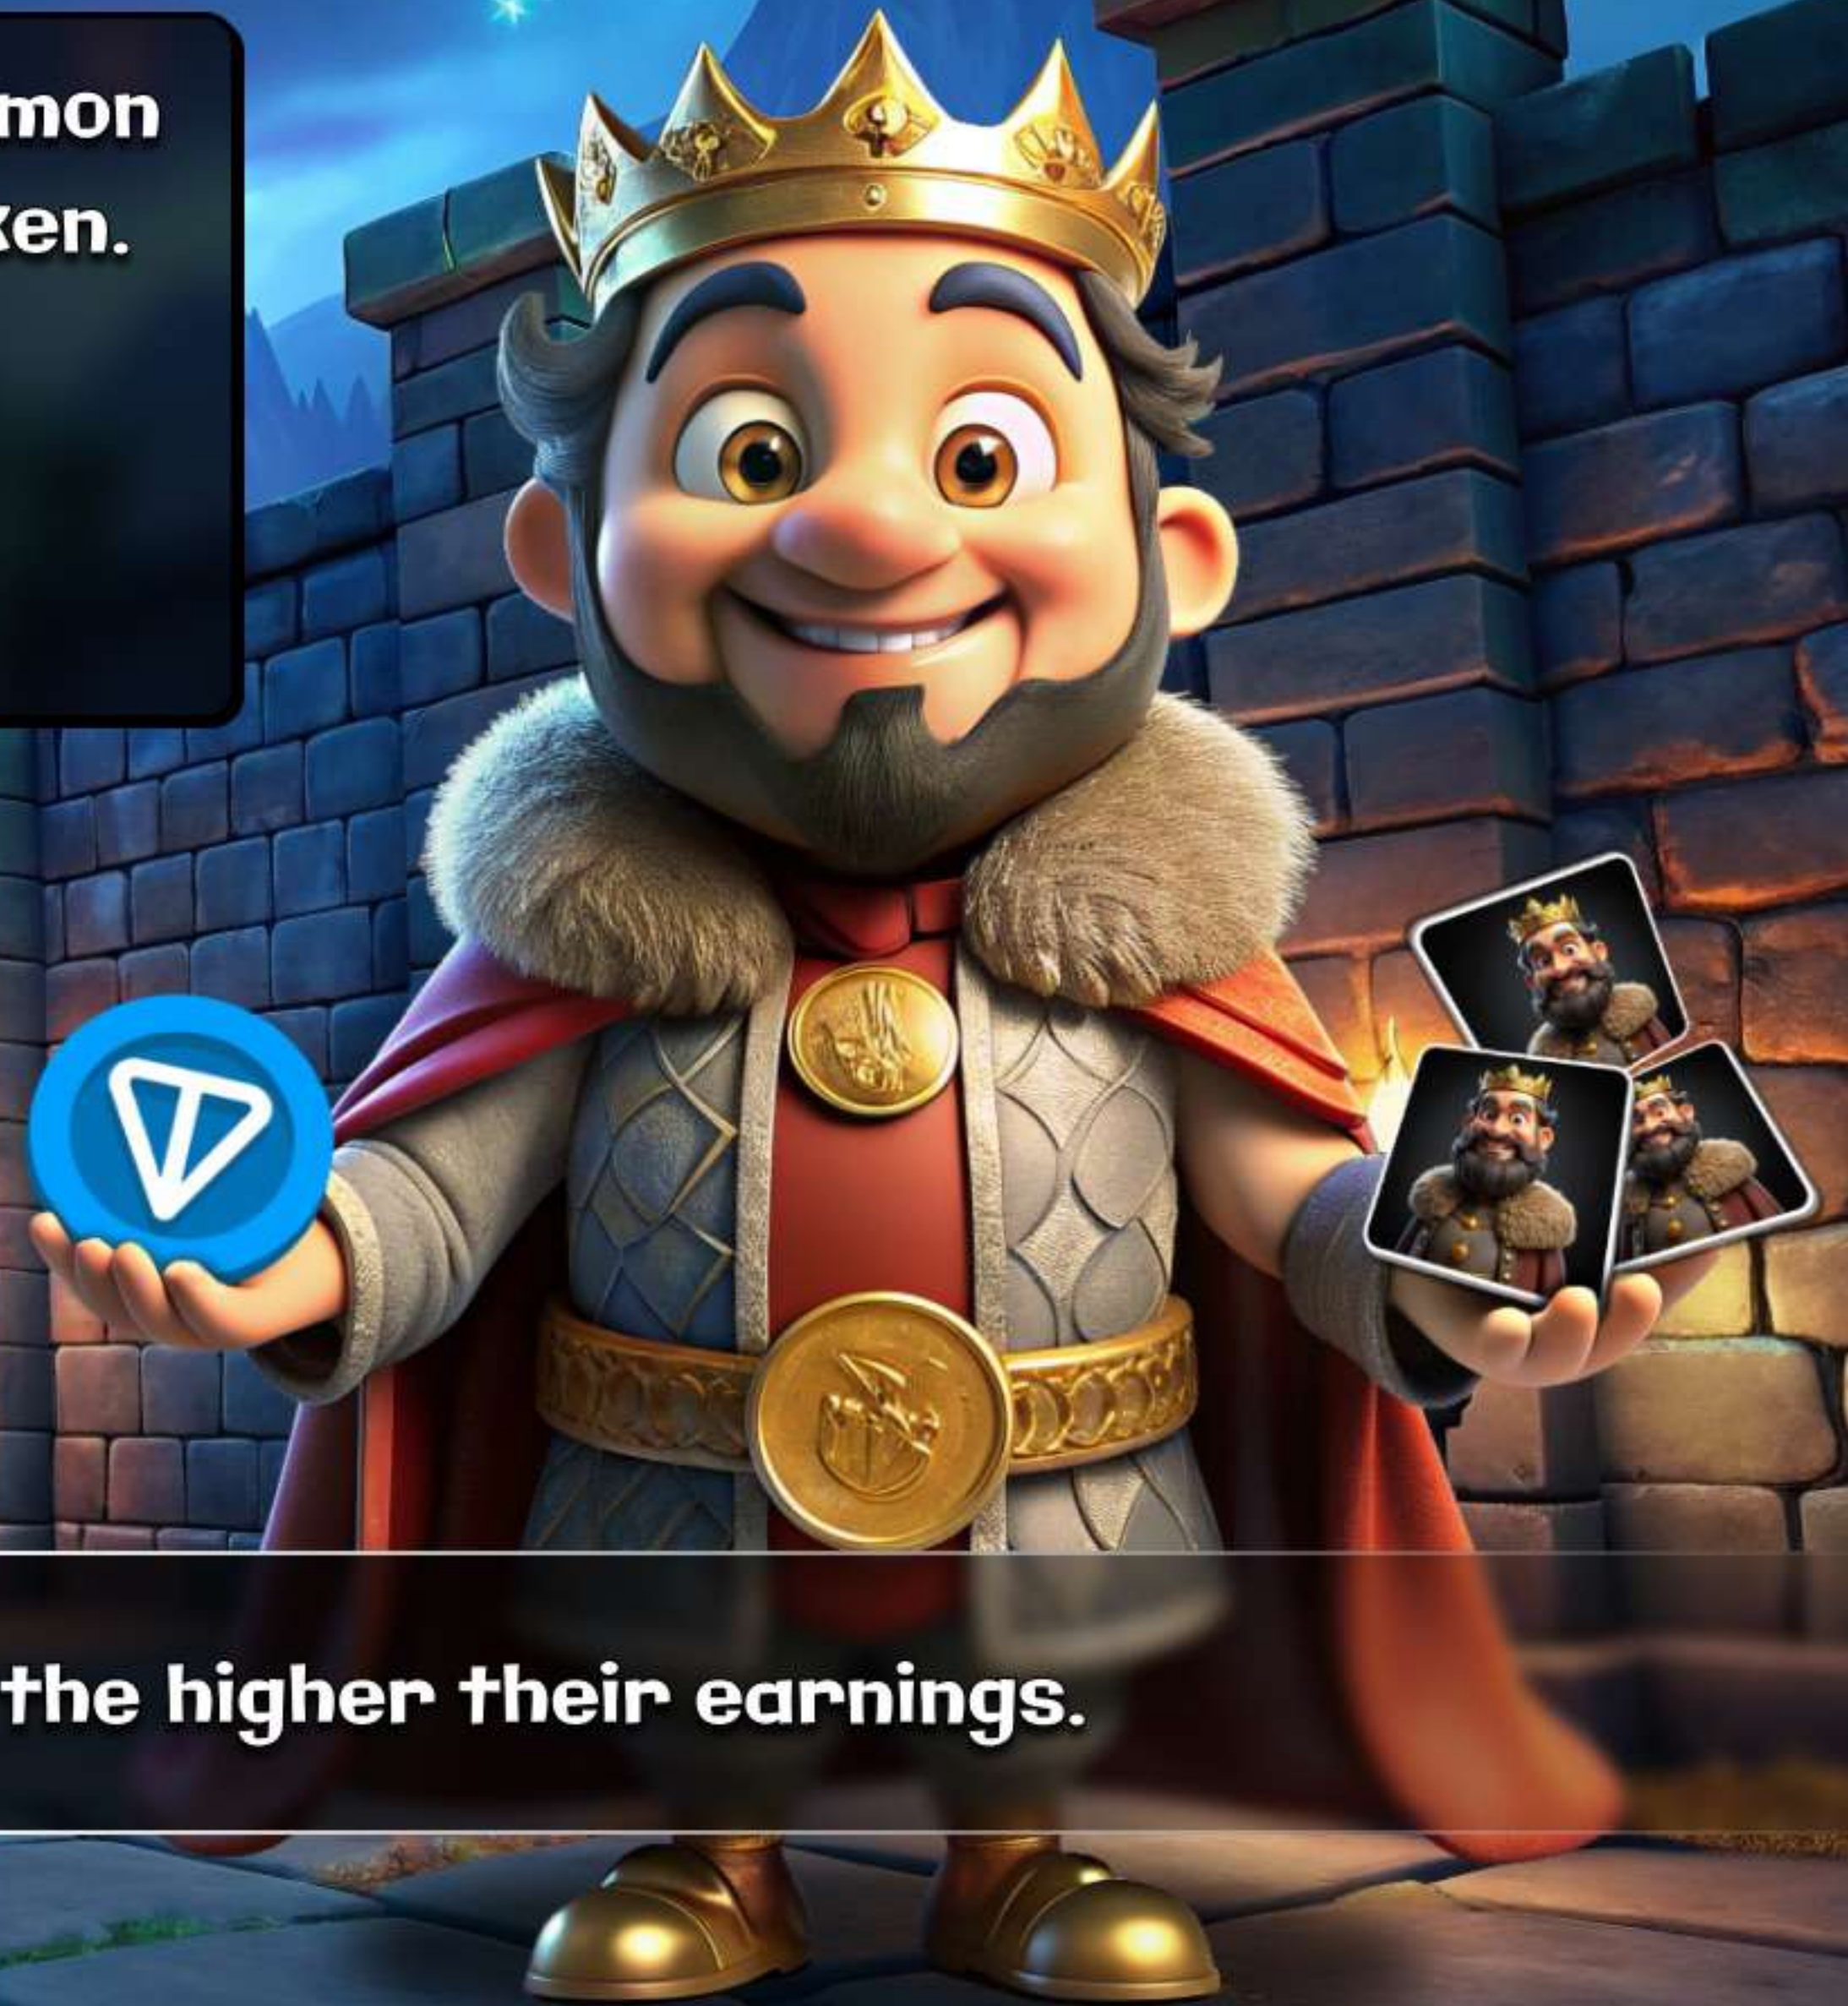

Bonus for Quantity:

If you have more than **20 King NFTs**, every additional **2 King NFTs** provide a boost to the mining rate of all **King NFTs** by **+0.001 \$GOLD** per hour.

NFT 1 - KING \$TON COIN MINING MECHANISM

Holders of **King NFTs** receive **\$TON** coins from a common pool once a week, in addition to mining the **\$GOLD** token.

This pool is funded by royalties from **NFT** sales and distributed proportionally to the number of **NFTs** in their wallets.

The more **King NFTs** a player holds, the higher their earnings.

NFT 2 - CASTLES

NFT Castles represent the second phase in the **TON Village** game.

NFT Castles can only be purchased using **\$GOLD** tokens. They not only symbolize your strength and power but also actively mine **\$GOLD** tokens with a high Annual Percentage Rate (%APR).

Key features of owning NFT Castles:

If a player owns **NFT Castles** along with **NFT King**, in addition to the high yield of **\$GOLD** tokens, the player also receives **\$TON** tokens from the overall pool of the **TON Village** game, directly proportional to the number of **NFTs** owned by the player.

NFT 2 - CASTLES

MINING MECHANICS OF NFT CASTLES AND NFT KING

Key Aspects:

Purchase of NFT Castles:

NFT Castles can only be acquired using in-game **\$GOLD** tokens

\$GOLD Mining:

Owners of **NFT Castles** automatically mine **\$GOLD** tokens with a high Annual Percentage Rate (APR).

The more Castles a player owns, the higher their **\$GOLD** earnings.

Additional Bonuses with NFT King:

If a player owns both **NFT Castles** and **NFT King** simultaneously, they receive additional bonuses in the form of **\$TON** tokens from the overall **TON Village** game pool.

The amount of **\$TON** received is directly proportional to the number of **NFT Castles** and **NFT King** owned.

Example Calculation of Rewards:

Initial Conditions:

- ◆ One Castle (NFT Castles) can be purchased for N $\$GOLD$.
- ◆ Each Castle generates n $\$GOLD$ per day through mining.

Ownership of NFT Castles Only:

- ◆ If a player owns 1 NFT Castles, they receive n $\$GOLD$ per day.
- ◆ If they own 2 NFT Castles, they receive $2 * n$ $\$GOLD$ per day, and so on.

Ownership of NFT Castles and NFT King:

Assume a fixed reward for one pair (1 NFT King + 1 NFT Castles) is N $\$TON$ per day.

The amount of $\$TON$ received depends on the number of pairs owned by the player.

Strategy:

To maximize earnings in the game, it is advantageous to own both a large number of Kings and Castles.

This strategy allows players to achieve both high $\$GOLD$ returns and substantial $\$TON$ rewards.

Summary:

Earning $\$TON$ depends on the number of NFT King and NFT Castles pairs owned.

5. NFTs

NFT 3 - LANDS

NFT Lands represents the third phase in the **TON Village** game.

Acquiring **NFT Lands** grants you the right to create new **NFT Kings**.

To do this, players must possess a complete collection of three **NFTs**: King, Castle, and Land.

By meeting the **Proof of Ownership** conditions, players gain the ability to create additional **NFT Kings** for free on a weekly basis.

NFT 3 - LANDS CREATION MECHANICS OF NFT KINGS

Conditions:

Full Collection:

1 NFT King + 1 NFT Castle + 1 NFT Land.

Proof of Ownership (PoO):

Proof of owning the full collection.

Mechanism:

Owner of the full collection:

If a player possesses a complete set of three **NFTs** and meets the **Proof of Ownership** conditions, they have the right to create additional **NFT Kings**.

Incubator:

The Incubator generates new **NFT Kings** every week based on the number of full collections owned by the player.

Examples:

Example 1: One full set

Assets:

1 NFT King + 1 NFT Castle + 1 NFT Land.

Proof of Ownership:  Confirmed.

Result: The player gains the ability to create 1 new NFT King for free every week.

Example 2: Three full sets

Assets:

3 NFT King + 3 NFT Castle + 3 NFT Land.

Proof of Ownership:  Confirmed.

Result: The player gains the ability to create 3 new NFT King for free every week.

Example 3: Full set and more

Assets:

1 NFT King + 1 NFT Castle + 1 NFT Land.

Proof of Ownership:  Not confirmed.

Result: The player cannot create new NFT Kings.

CONCLUSION:

Owners of complete collections of three **NFTs** (King, Castle, and Land), who meet the **Proof of Ownership** conditions, can create additional **NFT Kings** for free on a weekly basis.

The number of new **NFT Kings** that can be created is proportional to the number of full collections owned by the player.

Referral program

Inviting people to join your game is an exciting experience that combines social interaction with exciting rewards.

Every time someone you invited signs up, not only can you enjoy the game together, but you can also see your efforts pay off with special bonuses and incentives.

So go ahead, spread the word, and watch your game and rewards multiply!

The rewards are distributed as follows:

3%
Level 1

2%
Level 2

1%
Level 3

A 3D rendered king with a large, dark beard and a golden crown with a blue gem. He is wearing a blue tunic with gold trim and a brown belt with a large buckle. He is giving a thumbs up with his right hand. The background is a grand, arched hallway with a large circular window in the distance and a lit torch on the right.

INFERENCE:

TON Village is more than just a game; it's a world where every step you take, every decision you make, and every conquest you achieve leaves a mark on history.

Here, you can become the most influential king, create a powerful kingdom, and leave an indelible legacy.

Your destiny is in your hands. Join **TON Village** and start your great adventure today!
